

THE CHINOOK ADVANCE

Vol. 20

Chinook, Alberta, Thursday, July 23 d 1936

No. 63

THEY ARE GOING FAST

50 Pieces Enamel Ware each	.29c
Men's Straw Hats at	.25c
12 oz White Duck any length	
Films all sizes	.30 & .35c
Lemons per doz	.50 & .60c
Green Gage Plum Jam	.49c
White, Dark and Cider Vinegar cn tap	
Honey 5 lbs	.59c
Tea per lb	.45 to .65c
Keta Salmon tall tins 2 for	.25c
All kinds Fruit & Vegetables	

Acadia Produce Co.

A bad electric storm visited this district Saturday night giving one inch of moisture. This will help the feed situation somewhat also potatoes.

Relief road work started Thursday morning, the first task being the levelling of the hill leading from town to the cemetery. The work will be paid for in scrip.

Mr. A. V. Youell spent Sunday at Gooseberry Lake.

The local boys at the Gooseberry Lake boys camp returned home Tuesday, after an enjoyable time spent in swimming and other outdoor sports.

Sidney Whelan, Wesley Gilbertson and Rudolph Pfeiffer left last week for Big Valley in search of work.

Mr. and Mrs. E. B. Allen were Hanna visitors Saturday.

A community car of cattle was shipped to Winnipeg last Friday. Mr. Elwyn Robertson was in charge of the shipment.

Miss Evelyn Hyslop, who has been cook at the Hotel returned to her home at Alsask. She is succeeded by Miss V. Shantz, of Alsask.

JUNIOR WHEAT CLUB HELD MEETING

Field Day at E. B. Allen's farm was held Monday, July 20th, with Youngstown, Chinook and Map line Junior Wheat Clubs combining for their annual Field Day. There was a good attendance of parents and visitors.

Dean Tompkins, of Chinook Club was chosen chairman of the meeting and after a few introductory remarks he called on Mr. Buckingham (from the Field Crops Branch) to speak. He gave the boys a splendid talk on the different kinds of wheat, and advised as to the most profitable varieties to use in the dry belt.

The next speaker was Mr. Eaglesham (from the Dept. of Agriculture) who gave an interesting talk on grasshoppers and their extermination.

Robert Harrington was next called on. He gave a review of an essay which he had written on different kinds of grass which had won second prize.

Mr. Colts was there in place of N. D. Stewart and extended greetings from the Alberta Wheat Pool. He told the boys what a wonderful opportunity Junior Wheat Clubs furnished them.

Maurice Massey, who had gone to Calgary, from the Club gave a humorous account of the trip. Murray Turnbull also gave a report on the trip to Calgary last year.

At the close of the meeting lunch was served, then the boys played ball. This ended an enjoyable and helpful meeting.

WEEK - END SPECIALS

Jelly Powders	5 pkg	.23c
Pineapple sliced	2 tins	.25c
Dills	2 large tins	.43c
Spices	1-2 lb tin	.25c
Pure Plum Jam	4 lb tin	.39c
\$ Sodas wood-box		.30c
Quart Jars Gem	per doz	\$ 3
Blue Fibbon Coffee	3 lb pkg	.95c
New Apples, Cabbage, Potatoes etc.		

Chinook Trading Co.

COAL and WOOD

Jim Aitken

HOT WEATHER SUGGESTION

Aylmer Tomato Soup	per tin	.10c
Lemons	per doz	.45c
Oranges	per doz	.30c
Raspberries	2 boxes	.35c
Fresh Apricots	per lb	.15c
Fancy Pink Salmon	per tin	.15c
Oils, Greases, Gas, Nose Nets		

on hand

BANNER HARDWARE AND GROCERIES

SPECIAL

Ford power plant complete with gas tank, governor, pulley, radiator, & complete with frame, \$35.00

We have a Good Supply of Tractor Oils and Fuels.

I. H. C. & JOHN DEERE Repairs on hand.

COOLEY BROS.

REGINA EXHIBITION

JULY 27th to AUGUST 1st

Single Fare for Round Trip (MINIMUM FARE 25c) from all stations in Manitoba, Saskatchewan and in Alberta (Youngstown, Wainwright, Vermilion and East)

ON SALE JULY 25th to 31st and on August 1st for trains arriving not later than 2 p.m.

Return Limit, AUGUST 4th

Information from (insert name of Agent), Agent W. 36-348

CANADIAN NATIONAL

Mr. and Mrs. J. L. Massey left Tuesday on a motor trip to Brooks and other places.

Mr. and Mrs. Rideout, Audrey, Donna and Eldon also Mr. Howard Manzer motored to Gooseberry Lake Sunday.

Mr. Jacob Berry of Louisville, Kentucky, U.S., arrived here Tuesday to visit with his parents Mr. and Mrs. Harmon Berry.

Miss D. McLean and Jerry Youell who have been visiting at Alsask returned Tuesday.

Mr. and Mrs. Eaglesham left by motor Tuesday for Consort and other points.

Mrs. Geo. McIntosh and daughters, Jean and Patricia of Leslieville, and formerly of Chinook, are visitors at the home of Mr. and Mrs. Young.

Mr. E. O. Hocart, of the Pool Elevator at this point, is on a holiday at Calgary and other places.

Mr. and Mrs. Farnham, of Cereal, were visitors Tuesday at the home of Mr. and Mrs. M. F. Suiter.

Miss Kathleen Proudfoot is at present visiting with Miss Gay Massey.

Hamburger	per lb	.10c
Chuck Roast of Beef		.10c
Cottage Rolls	per lb	.25c
Veal Cuts now on hand		
Our New Wall Paper		
Samples have arrived, come in and look them over.		
Prices from .10c up per roll,		
Bring in your hides and horsehair. Highest prices.

Loans For Agriculture

Appropriate was the warning issued recently to investment companies and investors by S. P. Grosch, K.C., chairman of the Local Government Board of Saskatchewan when he told the Investment Dealers' Association of Canada in session at Jasper, Alberta, that they could not expect to be collectors alone, but must be prepared to continue to loan money.

At the same time, according to press reports of the convention, Mr. Grosch told the bond dealers that they "must be quick to offer concessions and help in debt adjustment if investors are to retain their status and the protection they now have."

It is generally well known that many of the loan companies, if not all of them, have shut down on loans in the prairie provinces and particularly in this attitude applicable to loans to farmers. Where the security is ample and prospects of repayment on maturing dates exceptionally good the mortgage companies are accepting a limited number of "risks" in the cities, but little if any loan money is available to western farmers just now, no matter what their record, how good the security they have to offer or how excellent the character of the prospective borrower.

Thus the farmer and the agricultural industry generally in the west is in somewhat parlous condition when it comes to securing credit to make needed improvements or to carry on operations. It is true that there are governmental boards in existence for the purpose of making agricultural loans but these institutions have either no money available or such a small amount in comparison with the needs of the day that they are obliged to restrict their activities to a few select loans.

In the very few instances where mortgage corporations are prepared to advance money they are still insisting on a return of seven per cent. for their investment and this is a higher rate of interest than borrowers can afford to pay in the light of income from ordinary revenue sources.

It is admitted, of course, that there are two sides to this story as with most stories. Loan company managers say that as custodians of private funds they cannot afford to loan money in the prairie provinces at the present time and particularly they cannot afford to run the risks of making loans to agriculturists. They point to the past few years of combined general economic and agricultural depression, the latter resulting from drought, surplus stocks of wheat and low prices for agricultural produce as an excellent reason why they should keep their purse strings tightly drawn when the farmer asks for a loan.

But more particularly do they inveigh against what they regard as repressive legislation enacted by the several provincial governments as a potent reason for withholding credit from the farmers, legislation which has been placed on the statute books in the belief of the sponsors that they are protecting debtors at a time when they knew not which way to turn to escape from almost intolerable burdens.

Possibly the loan companies themselves are not altogether without blame for this class of legislation in at least some instances, if Mr. Grosch's diagnosis of the cause of it is correct, for he is reported to have declared his belief that "one of the chief reasons for placing upon the statute books legislation which limits the rights of loan companies is to be found in the fact that some companies have adopted an attitude of drift and desire to wait until something turns up, with the result that the debtor gets in touch with a member of the legislature and demands all sorts of drastic legislation against loan companies."

One cannot get away from the fact that in the past four or five years, because of depression, conditions and lack of credit, farm property has been allowed to run down at heels, due to the impossibility of renewing or replacing worn out equipment in anything like the degree necessary to continue to operate on an economic scale or to provide new implements to meet changed methods necessitated by changing conditions.

Almost every farmer knows by experience that this is the case and if he is unable to secure the necessary credit to enable him to replace the worn out tools of his trade and to purchase new equipment necessary for economic operation, the day when he is going to be able to pay his past indebtedness is further deferred and the loan company and the farmer alike suffer as a result.

Since the entire western country is still largely dependent upon agriculture for its future as well as its present welfare, it would appear to be good business for the loan companies to offer concessions in the matter of debt adjustment to a feasible limit and continue to loan money at a reasonable rate for agricultural purposes where the security is satisfactory. Such a course would appear to be in their own interests, in the interests of the clients whom they represent, in the interests of the farmers and in the interests of the country to do so.

Paid While It Lasted

"Washing" canceled documentary stamps, worth from \$1 to \$20 apiece, and selling them again at full value to unsuspecting commercial houses, was a racket uncovered by Secret Service men in Boston. Stamp-collectors sold the stamps to the "washers," who were accused of doing the Government out of \$500,000 on stamps used for deeds and stock transfers.

The early Indians of North America made beads from the shells of clams, fresh-water muskells, and abalone, and used the beads as a medium of exchange. It was called "wampum."

Used Diplomacy

"Dearest," said the young mother, "I've decided to name our baby Samantha."

Disagreeing with her on the choice, her husband tried to solve the situation diplomatically. Finally, he said: "After all, that will make a fine name, dear. My first sweetheart's name was Samantha. I'm sure she'll feel complimented."

The baby was named Janet.

Junior: "What are distant relatives?"
Father: "They're the kind of people who call on you after making a long trip, and wish to avoid paying hotel bills."

Park System In B.C.

Acres Of Show Gardens Being Planned For Province

Six million acres of show gardens are being planned for British Columbia. Provincial and federal ministers are putting their legislative heads together to push immediate development of scenic parks in the coast province. Some are already well finished; others still a pencilled outline on the map.

Out of \$2,000,000 expected to go into public works this season, a sizeable lump will be used in grooming parks and building roads to make them easily accessible. The province, however, would hand over to the Dominion parks on which development has already started and concentrate upon new ventures, including the 3,000,000-acre tract named for Canada's governor-general.

At present the province looks after five of its parks and has mapped out four more for development. The Dominion has four more, completing a system that provides six acres of parkland for every inhabitant of British Columbia and more than half an acre for every person in the Dominion.

The 973 square miles of Garibaldi Park will be brought closer to trunk highways with completion of a \$6,000,000 suspension bridge spanning Burrard Inlet and joining Vancouver with its northern suburbs. Preliminary work on the giant bridge already has begun.

Up until now Garibaldi Park, cradled in the coast range, has been inaccessible to motorists. Game abounds in the timbered reaches, in the Alpine lakes and on the slopes of one of the volcanic mountains that rises to a height of 9,000 feet.

The province is keeping Tweedsmuir Park for its own. This, a vast garden that covers 3,000,000 acres of rivers, mountains and lakes, is largest of all. At present, the untended acres are threaded only by trails. Development of roads will be considered under a public works plan carried out by provincial and federal governments.

Maple Syrup Crop

Quebec Produced Largest Quantity This Year Since 1933

One of the French-Canadian province's foremost industries, the maple crop, this year reached the bumper proportions of 1,581,600 gallons of syrup and 5,747,900 pounds of sugar, a major portion of which was shipped to the United States. The largest crop since 1932, the maple sap produced a revenue of \$2,267,300, as against \$1,811,000 in 1934.

More than 40 per cent. of Quebec's maple sugar crop is annually bought by cigarette manufacturers in the United States, officials say. Meanwhile, French chemists are said to be experimenting on the possibility of using maple sap in the production of alcohol.

Roquefort Cheese

More Than 20,000,000 Pounds Are Manufactured Annually

More than 20,000,000 pounds of Roquefort cheese are manufactured annually in the picturesque French village. For more than 11 centuries this cheese has been manufactured on a commercial basis, but Roquefort cheese, itself, goes back even farther in history, as it is mentioned by Pliny the Elder, who wrote in the early decades of the Christian era.

More than 200,000 persons, working on 25,000 farms, are employed and earn their living directly from the cheese industry. Milk is contributed by 700,000 sheep, tended by 10,000 shepherds.

Preferred More Dignity

Servants Of English Earl Did Not Like His Democracy

Many years ago we used to correspond with Auberon Herbert, the son of the fourth Earl of Carnarvon, who, although a vigorous opponent of socialism, was one of the most democratic of aristocrats. He was so democratic that he insisted on his servants sitting at table with him and his wife. His servants disliked his democracy so much that at the end of a week they gave him notice that they were going to quit—"The Argonaut."

Trying New Method

On three farms in Oxford county, Ontario, an experiment is in progress with a new method of preserving alfalfa. The crop is stored in the silo in green condition and treated with acid.

England has two of the fastest battle cruisers in the world, the Repulse and the Renown, each having a speed of more than 31.5 knots.

Clever Men Beat Bank

Worked New System But Were Subsequently Caught

This stunt was revealed by an official of an important bank, victimized by the perpetrators, who since have been arrested. . . Two partners, ostensibly operating a legitimate business, opened a check account and deposited \$10,000. Within three months they had increased the fund to \$32,000, making the deposits in person, and getting to know the bank tellers. . . One partner then appeared, asking to cash a partnership check in the sum of \$29,458.27. The teller recognized the signature, okayed it, and then—as is customary—used the teller-stamp to ascertain whether a sufficient balance was on hand.

Simultaneously, the other partner appeared at another teller's window, asking to cash a \$29,458.27 check. This teller also used the teller-stamp, and the official upstairs wrote in reply: "Okay, okay. I told you it's okay." . . . The loss was more than \$27,000.—New York Post.

Eliminates Fire Hazard

Automatic Extinguisher For Airplanes Has Been Perfected

Fire is to be banished from aviation, according to British scientists who have been working for a long time on a new flame-prevention system for airplanes. Reports received in London say an automatic fire-extinguishing arrangement has been perfected which makes it almost impossible for a machine to catch fire either in the air or after impact with the ground. Extinguishers are fixed in vital parts, on the gasoline tanks, with jets leading to the gasoline pipes, over the engines, in the passenger cabins spring-operated automatic nozzles, and on the fuselage. They have spring-operated automatic nozzles which act if a bump exceeds the pressure at which the spring is set. Extinguishing liquid is sprayed even before fire can start and no flames can survive the action of this liquid.

Hypnotic Suggestion

Lecturer Claims It Is Wonderful Help In Dentistry

Students of the Royal Dental Hospital in London have had their teeth cracked, chipped, filled and extracted, all without anaesthetics—and all without pain. It's done by hypnotic suggestion.

"There is nothing mysterious about it," claims William Lovatt, who is lecturing on "hypnotic dentistry" in several large London hospitals, "it is a perfectly natural process and in no way harmful."

"A suggestible patient—and 70 per cent. are—has only to accept suggestions for anaesthesia and he can submit to the forceps or drill confident that he will feel nothing, either at the time or afterwards."

Experience with 3,600 cases, he says, has convinced Mr. Lovatt that the possibilities for hypnotism in modern medicine are enormous.

Lifted Tons Of Money

W. T. Dagger, of Blackpool, England, just retired from the Corporation service, has lifted over 300 tons of money in his 30 years of collecting from penny-in-the-slot meters. His collection, he estimates, has averaged \$90 daily in coppers, or about \$675,000 in 30 years. As \$5 in copper weighs just over five pounds his aggregate collection totals 302 tons.

Snowshoes For Quilts

The Dionne quintuplets will be able to waddle around in the snow next winter without sinking if Mike Lyons, of Clayville, New York, has anything to say about it, for he has constructed five pairs of snowshoes for the girls from Callander.

The hardest thing in making a speech is to know what to do with your hands.

Using New Ceremony

Dominions To Have Special Part In King's Coronation

The British Dominions will have a special part in the crowning of the King, a cable to the New York Times from London, said. It adds that following the coronation next May, King Edward VIII. will make a tour of the Dominions.

"When Edward is crowned in Westminster Abbey on May 12, 1937," it says, "Canada, Australia, South Africa and New Zealand will receive positions in the ceremonies emphasizing their new importance as self-governing nations under the Statute of Westminster, enacted since the last coronation."

"In accordance with this statute, the King becomes not only ruler of the British Empire as a whole, but separately and distinctly King of the Dominions. A new ceremony will be prepared stressing this conception of the King as the direct head of each Dominion. Through the Dominions Office conversations have reached an advanced stage regarding the exact part the Dominions will play. The crowning of the King in this new form will be the prelude to a royal tour of the Dominions."

SELECTED RECIPES

ROLLED NUT WAFERS

1 1/2 cup "Crown Brand" corn syrup
1/2 cup butter
1 cup bread flour
1/2 cup sugar
1 cup chopped walnuts, or peanuts
Heat the "Crown Brand" corn syrup to the boiling point, remove from heat and add butter. Then, slowly and stirring all the time, add the flour which has been mixed and sifted with the sugar. Now add the chopped nuts. Drop small portions from the tip of a spoon on a greased cookie sheet, 2 inches apart. Bake in a slow oven. These cookies can be rolled or just left plain.

Gliding In Stratosphere

May Be Possible According To Tests Made In Moscow

Gliders may be able to reach the stratosphere ere long, according to reports from Moscow. By a new method a glider may be towed to a great altitude, the towing wire then paid out until the glider is 6,500 feet above the towing plane. If a second glider is towed by the first and its line paid out it can ascend above the first. Thus a plane flying below the stratosphere can, by this flying "chain" tow a glider miles above it. Gliding Master Venslav has been making the tests.

Fastest Speaking

It is interesting to have the testimony of George Emery (who has written 150,000,000 words in shorthand) to the fact that people speak much faster than they did; the average increase he estimates at something like 25 per cent. The coming of the motor-car seems to have affected the national rhythm. Even much of the music we hear is taken considerably faster than the composer intended.—London Observer.

Not until 1870 were milk cows known in Japan. An American cow was imported at that time and two men, selected for their strength, were assigned the task of wrestling the milk from her.

Working On Anti-Fog Ray

Marconi Is Busy Trying To Perfect New Invention

Were Charles Darwin alive, he would not agree with the dissipation of the dark vapor which assails Great Britain mainly during cold weather, for the famous naturalist's delight of London was founded in a fog.

He gloried in its "grandeur," as he said, and always looked forward to wintering in the metropolis, attracted by the prospect of smoky mist. Although the origin of the species of town fog is the deadly smoke, harbingers of ill health, the Victorians suffered these visitations with no hope of a "cure"; but today scientists are having promising results.

Research in there have been many attempts to find the best method, and the outcome seems to be that future research will be centred around the aeroplane. The basis of experiments has been to spray chemicals—down on the fog, and the mist will vanish sufficient anti-fog mixture is used. Already headway has been made, but the drawbacks at present are the cost and lack of facilities, for a huge fleet of planes would be necessary to remove a yellow "peasouper."

The most recent anti-fog developments promise to end all this fog, however; but a deadly and dispelling invention of wide application will be available. It may be a ray, a powder, or chemicals. Everything depends upon the scientists.

Forgotten Eskimo

Scientists Will Search For Traces Of Civilization In Eastern Arctic

Traces of a forgotten Eskimo civilization in the eastern Arctic will be sought by a Dominion government scientist who left for the north on the Nacopie, sailing from Montreal.

It is the annual patrol to government posts in the north with the holds of the veteran Arctic ship bulging with mail and supplies. In a 10,000-mile cruise that will take the ship within 800 miles of the North Pole, contact will be made with 35 posts.

Included among the passengers was Douglas Leechman, an anthropologist from the National museum, who will spend several weeks on the Bughton islands, lying at the eastern tip of the Ungava peninsula.

In the far-eastern Arctic, tools of bone and ivory have been unearthed that bore no resemblance to those used by Eskimos in other sections of the north. Scientists believe they indicate a peculiar Eskimo civilization now extinct, which Leechman will try to trace. He will probe old village sites on the islands in the hope of finding some clue to the date and character of the ancient culture.

By improved technique, surgeons report that it is now possible to cut and lengthen bones so as to extend a shortened leg as much as five inches.

No enemies to forgive? Then pardon a few friends.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ready to Go

The liver should pour out two pounds of fluid bile into your bowels daily. If this bile is not flowing freely, your food is not digested. It just decays in the bowels. Gas builds up your stomach. You get constipated. Bile enters the bowels and you feel sour, sick and the world looks pink.

A new bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle. They make the bile flow freely. They do the work of a laxative but have no color or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER I.—Continued

Starr had not realized that her tempestuous words had been spoken aloud until the man's voice interrupted. It was a crisp, pleasant voice, with a lazy, amused drawl. She whirled around to face him, hands gripping her handbag tightly as the nearest support.

The man had detached himself from the careless crowds, and stood not far from her elbow, indolently leaning against a corner of the show window frame. He was looking down on her with quizzical gray eyes that held a glint of humor in their depths. For that first startled moment Starr's complete vision was filled with him. He was tall, handsome in a bronzed, broad-shouldered, slim-waisted way, with a physique that bespoke the owner a pride of its possession in its care. He wore dark, smartly tailored clothes which were unerringly placed in their category of good taste. Money, too, of course. That he was accustomed to that as to the air he breathed was to his slightly arrogant features, features which had just the proper tinge of hardness to give him an air of interesting masterfulness.

The smile of tolerant—or was it condescending?—amusement curved his lips more widely as he looked straight into Starr Ellison's upturned face, from which the eagerness of her passionate plea had not fled.

"So you want to play, do you?" he repeated, with maddeningly slow emphasis.

Starr could not understand why on the instant she was not annoyed at his intrusion, or his very apparent jibing. Such a short time ago

the Starr Ellison she had always known would have thought furiously: "Masher!" and one look would have been a crushing retort to him.

Today it did not matter. Such things were of so small account. Nothing mattered, anyway. Everything was an affair of relativity. Things were important only because of the bearing they had on your future. With barely six months to live, which could be considered practically no future at all, what did it matter what she might say or do? What anyone else in the world might say or do?

Even though she was surprised at herself, steadily Starr returned the contemplative scrutiny of the gray eyes that were amusedly regarding her. She placed him. Readily. The man before her represented that gray, smart world she had never known, for which she had yearned—the other half of the world which knew how to play. He had taken advantage of the opportunity. He stood for all she had lost in life and could never hope to attain.

She cried out at him suddenly, her eyes blazing at him as though she were, through him, hurling her defy to earth and heavens:

"Yes, if you must have it! More than anything else in this wide, wide world, I want to play!"

The smile in his eyes was tauntingly on his lips, as he drawled:

"That, I should imagine, should be something not too hard to arrange—"

But, agitated at herself, Starr was backing away, long lashes dropped over her confused eyes. What had she done? Unnoticed she backed into a passerby. The gray-eyed man's hand went out to touch her arm.

"Wait a minute," he said. "We ought to talk this over a bit, hadn't we? There's no hurry."

His smile was friendly. "The Arabs, you know, have a saying: 'What is there to hurry for? We are all going the same way. Why should we try to pass one another? Let us enjoy today, for today will never come again.' " Of course this isn't Egypt, but—

He stopped short at the look of blazing fury in the depths of the girl's dark, mysterious eyes. Her voice was a flame at him.

"I hate Egypt!"

Then she was gone, flying up the avenue, losing herself in the crowds, never looking back. Michael Fairbourne stood staring after her. Then he grinned and shrugged as he lighted a cigarette and moved carelessly along the street.

"Seem to have dubbed my shot again, eh?" he murmured. Then he glanced along the street as if he again seeing the black-eyed girl with the camellia skin. "Still, I'm wondering a little—"

CHAPTER II.

There was no good reason for Starr Ellison to be on Fifth Avenue that cheerful early Autumn mid-day. Only that it was not Sixth Avenue. Nor was there along it any employment offices, wordlessly insisting on her need for job hunting in the sordidness.

After her visit to the doctor, with whose smiling assistant she had, incidentally, left the greater part of her small remaining store of cash—for the privilege of being told she had only six months more of life—such small and distasteful matters as searching for a job appeared of small moment. Especially when there were no jobs. Why keep on hunting for the job which she could merely keep the breath of life in her body for six months more? It hardly seemed worth while.

Such thoughts were in Starr's mind as she fled along the street after her tempestuously uttered rebellion against Fate in the atmosphere of the prosperous Avenue. Nevertheless, she mechanically turned at the next corner and sought the street made clamorous by the El overhead, and headed for the agencies which were on her list and not already tried that day. She couldn't be a quitter entirely, she supposed, even if she had no short a time to fight. Work was most necessary at the moment. Vitally so, for she had a most distasteful memory of her search that morning with the keeper of her rooming house. A dreary, hopeless kind of place it was, but Mrs. Maloney who kept it, had made it quite plain to Miss Ellison that she had waited for her rent quite long enough, and that while she was waiting, she might as well be paid for her rooming house. A dreary, hopeless kind of place it was, but Mrs. Maloney who kept it, had made it quite plain to Miss Ellison that she had waited for her rent quite long enough, and that while she was waiting, she might as well be paid for her rooming house.

None too pleasant a prospect, and it was beginning to look like a rough ride ahead for a girl who, at most, had in her purse only enough for lodging for a night or two some-

where—without baggage. Even if she were going to pass out in six months, in the meantime, she supposed, she would have to sleep somewhere.

A wry smile crossed Starr Ellison's lips as she rushed along. She—she—who didn't know where she was going to sleep that night, had been wasting her time on Fifth Avenue, rebelling against not having a taste of life. She had been wanting to play!

She didn't know that noon had come, and forgot that her breakfast had been a doughnut and a cup of coffee until she suddenly realized that the crowds who were jostling her, elbowing her, were making their way into the rows of eating places that sat cheek by jowl along the cross street. She stopped still before one of them, drawn irresistibly by the sight of the good things to eat temptingly displayed. Another show window!

She forgot that she was hurrying to look for a job, forgot she had wanted to play, forgot even for that minute what that doctor had told her, as her eyes widened at sight of the food, and then swept on further to the people at the tables. In her eyes was an expression of looking upon some amazingly absorbing scene, but it was no more upon which she gazed than the vista of food and warmth that spread out in one of those restaurants which not so long ago Starr Ellison would not have bothered to give a passing glance.

Two prosperous looking business girls were having their luncheon near the window—a substantial meal, with a steak that was simply cooing butter gravy, new peas and the crispest looking salad.

(To Be Continued)

Likes Canadian Kitchens

England Behind In That Respect States Woman From Wales

Kitchens of Canada and the United States had been a revelation to many countrywomen from across the seas. Mrs. Frank Gresham, of Wales, a delegate to the recent convention in Washington of the Associated Country Women of the World, commented as she passed through Montreal en route for her home.

Mrs. Gresham said that in English kitchens old pans and old ways were too prevalent, while kitchen planning was still too much "an idea only." "It is nonsense to say we have nothing to learn from other countries," she remarked.

Bamboo Tree Grown In B.C.
Basil Keys, British Columbia horticulturist, is creating a tropical paradise. Seeking to prove that his theory that bamboo trees can grow in Canada, Keys completely surrounded his home with a half-acre varieties of the tropical trees. The trees were flourishing.

His Majesty's Portrait FREE

Copyright—Bassano

THE makers of Bee Hive Golden Corn Syrup and Durham Corn Starch are happy to offer to their friends throughout Canada a handsome two tone reproduction of His Majesty, King Edward VIII. The portrait, (by Bassano) is one of the most recent and has been specifically designed for framing, measuring approximately 9" by 11". It is restrained and dignified and when framed will blend in perfect taste with the furnishings of the finest room. Many well deserved compliments have been received on the beautiful appearance of this portrait.

ST. LAWRENCE STARCH CO. LTD.

How to Secure Free Portrait

Send in one Bee Hive Golden Corn Syrup label and one Durham Corn Starch label with your name and address written clearly on the back of either label, along with the words—"King's Picture." Mail to the St. Lawrence Starch Co. Limited, Dept. 8, Port Credit, Ontario and your free portrait will be forwarded promptly.

Have no colored or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

10c WHY PAY MORE

Best of all fly killers. Clean, quick, sure, cheap. Ask your Druggist, Grocer or General Store.

THE WILSON FLY PAD CO., HAMILTON, ONT.

"I am surprised at you. You know KEEN'S is the best." "Well, I thought when I was putting up my pickles I could save some money by buying cheap mustard. But never again! Cheap mustard has not the flavor, the strength nor the keeping quality. I've learnt my lesson. It pays to buy the best—KEEN'S D.S.F. MUSTARD."

Made from seed grown in the Fens of England. Shells or hulls are removed and only the inner part of the seed is used. Superfine grinding ensures the full mustard flavor.

In original tins for as little as 10¢

KEEN'S D.S.F. Mustard

COLMAN-KEEN (CANADA) LIMITED 1000 Amherst Street, Montreal, P.Q.

The Big Nickel

Looms Large On The Collection Plate, And Is As Common As Sin

"One of the hardest things the church has to face is the big silver nickel," Rt. Rev. John Lyons, lord bishop of Ontario, said at the unveiling of a tablet in St. James Memorial hall at Joyceville, near Kingston, Ont.

"The big nickel is as widespread and as common as sin itself," he said. "It is often a matter of wonder to me how people manage to collect so many. People contribute adequately without complaint to amusement. Probably if these people fully realized the problems of the church, they would be of greater assistance."

Native Shrubbery

The scarlet fruit of the silver buffalo-berry tree imparts a gay touch to the prairie farms where the tree is used in the surrounding shrubberies. It is a native of the prairies and is found in hills and along streams from the Peace mountains in Manitoba to the Bow river in the Rocky Mountains. In the Manitoba hills the tree grows to a height of 18 feet. It is generally armed with thorns.

Removing Old Arch

The Arch of Triumph, built by Alexander I, to celebrate Napoleon's retreat from Moscow, is to be razed to make way for traffic. The arch, more than 100 years old, stands on Gorky street, near the White Russian Railway Station, point of arrival and departure of tourist trains.

Horseback Trail

Will Be 2,500 Miles Long, Extending From Canada To Mexico

Plans for a horseback Pacific coast trail, extending from Canada to Mexico, have been announced by the National Park Service.

It will be 2,500 miles in length and will be continuous on all the higher mountain trails on the coast. It also will connect all intervening national parks.

Nearly all of the work is to be done by the CCC and the trail is expected to be completed this year.

Metal signs will mark the entire route for the benefit of horseback riders or hikers.

"I know an artist who painted a cowbooby so real that a maid spent an hour trying to get it down."

"Sorry, but I don't believe you."

"Why not? Artists have been known to have done such things."

"Yes, but not maids."

Cut flowers last longer in water if the lower leaves are removed from the flower stem, so that they do not decay in the water.

Little Helps For This Week

That good thing which was committed to thee, keep by the Holy Ghost which dwelleth in us. 2 Timothy 1:14.

Oh! that the Comforter would come. Nor visit as a transient guest, But fix in me His constant home, And keep possession of my breast, And make my soul His loved abode, The temple of indwelling God.

The real progress of your soul in the divine life is a tender plant. It requires stillness, meekness, and the unity of the heart totally given up to the unknown workings of the Spirit of God, which will do all its work in the calm soul that has no hunger or desire but to escape out of the mire of its earthly life into a life with God. It is not wise to yield to an eagerness of many things which although they seem innocent will divide and weaken the workings of the divine life within you.

The French were the first to use airplanes extensively.

FOALING TIME PROBLEMS

This is the foaling season and as the arrival of a colt from a good mare is always somewhat of an occasion on a farm, a brief discussion of a few common foaling-time problems may be of interest to those of our readers who have mares in foal this spring.

At the lutebridge, station, mares in foal are given some special consideration, particularly during the last half of the pregnancy period in that they are not called upon to do heavy work at which they would require to strain, but they are used at light work regularly right up to within a week of foaling time. A mare normally carries her foal for about eleven months, but there is some variation in this regard and after 10½ months an in-foal mare is watched for the appearance of signs which indicate that the time of foaling is not far off. One of the first signs of foaling is an increase in the size of the udder. Usually about a week before the colt arrives, a thick liquid begins to ooze from the teats, and the teats become "waxed". At this time, the mare is taken out of the harness and, weather permitting, is placed in a small clean pasture. If pasture is not available, a clean roomy box stall is used. When milk begins to drip from the teats, and, at the same time, the vulva increases in size and discharges a colourless mucous, and the muscles around the tail head relax, the mare is watched very closely, as these signs indicate that the foal may be expected within 24 hours. A mare at this time is nervous and uneasy. She may stop eating, stamp her foot and get up frequently or, if in pasture, begin to "walk the fence".

If the weather is fine the best place for a mare in foal is out on clean pasture, but if the weather is cold or wet, it is safer to have her foal under shelter in clean quarters where she has plenty of room to stretch out. Mares usually foal quickly and easily and without assistance. Weather this past week has been excellent. However, it is advisable to have an attendant close at hand to give some attention to the newly-born foal. As life hangs by a very thin thread at this stage, it is important to make sure that the foal's nostrils are quite free of any fetal membranes which would interfere with normal breathing. Usually the mother will attend to the crying of the foal and the only assistance necessary is the disinfection of the navel cord. This is done by painting the stump thoroughly with tincture of iodine—a simple precaution which does much to prevent such common diseases as joint- or navel-ill and scours. The newly born foal should receive some of the first milk or colostrum, as this acts as a natural physic to clean the bowels and prepare the intestinal tract for normal action. If the foal is weak or the mare excited so that the colt has difficulty in sucking some assistance is given. As exercise, fresh air and sunlight are beneficial to the mother and her foal, both are, weather permitting, allowed outdoors within a few hours after the act of foaling. If good pasture is not available, the mare's ration for the first few days is made up of light feeds of oats mixed with bran and limited amounts of hay.

Mrs. J. C. Long and baby of Three Hills, arrived at Chinook Sunday, where they visited for a few days at the home of her parents, Mr. and Mrs. A. E. Roberts. They left Tuesday for Mr. Lorn Proudfoot's where they will visit for the remainder of the week, when Mr. Long will meet them.

Mr. W. W. Isbister who spent the past two weeks at Calgary returned Tuesday.

Mrs. A. E. Roberts left Tuesday morning for Red Deer where she will meet her daughter, Mrs. Bertin Bjorsvik.

Mrs. Jas. Young visited over the week end at Hanna with her daughter Mrs. Kerby.

IMPARTIAL AS LIGHT

YOU cannot argue with light. It just shows you things as they are. It plays no favorites. It gives brightness to the things that are already beautiful and it floods revealingly into the dark corners to show the dust and the grime and the hidden ugliness. If you guess at the nature and quality of things that are only half seen, if you see things that are not there, your eyes and your imagination are to blame. You cannot blame the light. For it can only illumine the aspects that are turned towards it.

NEWS is like light. It sheds a beam on men and events. It lifts the darkness from promotions and policies. It penetrates to hidden things and shows the truth as it is, for all to see.

THE news columns of a good newspaper are impartial. They tell the truth as it is found, they give all the facts that are known. The same news that guides its editorial opinions is there in full to inform your own judgments. It is the chiefest function of a reputable newspaper to bring everything of importance to the people into the daylight of publicity, discouraging vice and corruption and chicanery.

The independent newspapers of Southern Alberta shed the light of truth on the happenings and developments that interest you. Read them, confident in their integrity.

Wedding Bells

A quiet wedding took place at Hanna on Saturday when Mrs. Mary B. Walker, of Youngstown became the bride of Mr. S. W. Warren, of Chinook.

The Advance joins the many friends in wishing Mr. and Mrs. Warren a very happy married life.

Mr. and Mrs. S. W. Warren were guests at the home of Mr. and Mrs. E. B. Allen on Sunday, also Mr. and Mrs. Eaglesham.

Miss Margaret Davis returned on Tuesday from Olds where she received a week's free tuition at the School of Agriculture, having won the School Fair Scholarship.

Art Jacobson was a week end visitor at Calgary.

Old Timer's Reunion held

On July 15th the Old Timers once again gathered for their annual picnic at Forkners Grove. The weather was hot and the Booth was kept busy.

The baseball games had a good audience, Chinook played Cando, the latter winning, and played Stimson and won.

The game played by the "Old Timers," men over 40 was quite interesting and drew a number of comments were made by the spectators.

Coffee was served and a collection was taken to defray expenses also to have a mail fund on hand.

The children ran races and all those who were competing received a reward which was readily spent at the booth.

The younger set went to town where they took in the dance held in the Hotel Ballroom while the old timers went to their way home at the end of another memorable day, and for once, it did not rain, much to the disappointment of all. The committee wish to thank all those who helped in any way to make the day a success.

The following is an account of the Finance Committee:

Finance Committee
Messrs Edwin B. Allen, E. J. Ellis and J. W. Rideout.

Mr. and Mrs. Spreeman and family, Mr. and Mrs. A. McLennan, Mr. R. Stewart, H. Leggett, F. Zeile and others went to Nazareth camp at Red Deer, this week.

Jas Aitken returned from Vancouver Wednesday bringing with him his mother, Mrs. Andrew Aitken, his sister, his aunt, Mrs. Harry James also Miss Marjorie Lee.

"Somebody is painting the town" or necessarily red but I fear colors. The C. N. R. Station has succeeded and will soon be trimmed with paint. Rideouts are repainting their home, while Cooley's are redecorating their Oil Pumps.

Jas. Peyton left Thursday morning for a trip to Brooks.

Although some people may think it, Chinook is not the hottest place in Alberta, for some places the thermometer has registered as high as 114 degrees. In Banff there is great concern over forest fires, because if oncever started it would be the last of Banff. Things are the driest there in the history of the resort.

Several farmers were caught in town last Saturday night, not believing that there might be rain in "Them there clouds." In spite of the fact it was a happy occasion.

Much to "Happy" Milligan's sorrow, Evelyn Hishop has returned to her home in Alaska before taking a position in Calgary.
